Quiz: Tuples

If you want to run test code related to any of the quizzes on this page, use the coding space from earlier in the lesson.

Quiz Question

Match the following qualities to their data structure.

✓ These are the correct matches.

Data Structure	Quality
Tuples - are they ordered or unordered?	<button>ordered</button>
Tuples - are they mutable or immutable?	<button>immutable</button>
Lists - are they ordered or unordered?	<button>ordered</button>
Lists - are they mutable or immutable?	<button>mutable</button>

Quiz Question

What would the output of the following code be? (Treat the commas in the multiple choice answers as newlines.)

```
tuple_a = 1, 2
tuple_b = (1, 2)

print(tuple_a == tuple_b)
print(tuple_a[1])
```

☐ True, 1

☐ False, 1

☒ True, 2

☐ False, 2

☐ Error
